2 CONTENT

Clarity Techworks hosted a discussion on ICT and fintech evolution, led by CTO Mr. Yee Soon Tuck. The talk covered essential qualities for tech employees like self-learning, motivation, and problem-solving. Team members shared insights on skills such as communication and creativity. The event also highlighted ICT roles, industry trends, and career development opportunities.

3 Reflection

Clarity Techworks hosted a talk on ICT roles in FinTech and blockchain, covering the company's profile, key positions like blockchain developers and cybersecurity experts, and skill requirements. The session emphasized talent development, training opportunities, and industry trends.

4 EXECUTIVE SUMMARY

Mr. Yee, CTO of Clarity Techworks, and his team discussed essential qualities and skills for ICT roles in the company. Key traits for tech employees include self-learning, high standards, motivation, problem-solving, teamwork, integrity, and a passion for technology. Team members shared their job scopes: Mr. Saiful, a web/API developer, handles API production and backend problem-solving; Ms. Liyana, a QA Testing Analyst, ensures product quality; Mr. Syarifah, a junior UI/UX designer, focuses on wireframing and prototyping; and Mr. Ridwan, a junior Android developer, works on feature implementation and bug fixing. They emphasized skills like communication, creativity, attention to detail, and continuous learning. Mr. Ridwan encouraged students to develop software, publish on GitHub, learn from experience, and network. The talk inspired students with valuable insights and motivation for their tech careers.
